Cpp loops for/while/do-while

MCQs

Q1- Passes through a loop are called

a) enumeration

b) iteration

c) culmination

d) pass through

Q2- A continue statement causes execution to skip to

a) the return 0; statement

b) the first statement

c) the statement after the continue statement

d) next iteration of the loop

Q3- Which is the best looping technique to be used when the number of iterations is known?

a) for

b) while

c) do-while

d) all looping processes require that the iterations be known

Q4 - Which one of the following is not an entry controlled loop?

a) for

b) while

c) do while

d) none of the above

Q5- In a group of nested loops, which loop is executed the most number of times?

a) the outermost loop

b) the innermost loop

c) all loops are executed the same number of times

d) cannot be determined

Answers:

Ans 1 : b) iteration

Ans 2 : d) next iteration of the loop

Ans 3 : a) for

Ans 4 : c) do while

Ans 5 : b) the innermost loop
